Your APA6-Style Manuscript

Introduction

Your introduction goes here! Some examples of commonly used commands and features are listed below, to help you get started.

If you have a question, please use the support box in the bottom right of the screen to get in touch.

Some \LaTeX Examples

Sections

Use section and subsection commands to organize your document. \LaTeX handles all the formatting and numbering automatically. Use `ref` and `label` commands for cross-references.

Comments

You can add inline TODO comments with the `todonotes` package, like this:

This is an inline comment.

References

LaTeX automatically generates a bibliography in the APA style from your `.bib` file. The `citep` command generates a formatted citation in parentheses (Lamport, 1986). The `cite` command generates one without parentheses. LaTeX was first discovered by Lamport (1986).

Tables and Figures

Use the `table` and `tabular` commands for basic tables — see Table 1, for example. You can upload a figure (JPEG, PNG or PDF) using the files menu. To include it in your document, use the `includegraphics` command as in the code for Figure 1 below.

Mathematics

L^AT_EX is great at typesetting mathematics. Let X_1, X_2, \dots, X_n be a sequence of independent and identically distributed random variables with $E[X_i] = \mu$ and $\text{Var}[X_i] = \sigma^2 < \infty$, and let

$$S_n = \frac{X_1 + X_2 + \dots + X_n}{n} = \frac{1}{n} \sum_i^n X_i$$

denote their mean. Then as n approaches infinity, the random variables $\sqrt{n}(S_n - \mu)$ converge in distribution to a normal $\mathcal{N}(0, \sigma^2)$.

Lists

You can make lists with automatic numbering ...

1. Like this,
2. and like this.

...or bullet points ...

- Like this,
- and like this.

We hope you find writeL^AT_EX useful, and please let us know if you have any feedback using the help menu above.
